### **1. PHRF and Multihull Rating Factors**

Boats in the PHRF division will be scored time-on-time using their PHRF-DW ratings, calculated as  $500/(\text{PHRF-DW})$  rounded to four decimal places. This time correction factor (tcf) will be applied in scoring PHRF divisions. For boats that qualify for the Pacific Cup overall by having a certified (weighed) rating, the corrected times will be used for calculating the winner of the Pacific Cup. Competitors are reminded that non-certified ratings are not eligible for the overall Pacific Cup Trophy.

Boats in the Multihull Division will be scored time-on-time using their BAMA rating, calculated as  $1.2 * \text{OMR}$ .

### **2. Start Dates**
